Languages: Python, XML, HTML/CSS, SQL, Swift (iOS)
Databases: PostgreSQL, Psycopg2, DB Migration via ETL
APIs & Integration: xmlrpc API, REST API Design & Implementation, WooCommerce API
Automation & Data: Python-Celery, Selenium, Pandas, Data Scraping
Other: Machine Learning (SVM, K-NN), MATLAB, Xcode

PROFESSIONAL EXPERIENCE

Odoo Developer | Etugra — Turkey (Remote) *May 2023 – Present*

Delivering full-cycle Odoo ERP implementations for global clients across E-Commerce, Retail, and Education sectors.

- Developed and deployed customized Odoo modules for multiple projects simultaneously
- Led E-Commerce integrations and custom retail workflows, reducing manual operations
- Performed DB migrations and data corrections using ETL pipelines and Psycopg2

Tools: *Odoo, Python, PostgreSQL, XML, Psycopg2, xmlrpc API, ETL*

Odoo Engineer | Invozone — Lahore *May 2022 – Apr 2023*

Built and maintained ERP applications with a focus on HR modules, multi-version Odoo deployments, and automated scheduling.

- Designed and delivered HR and payroll modules for internal and client ERP systems
- Automated recurring tasks using Python-Celery, reducing manual workload significantly
- Fixed and corrected large customer data-sets via SQL queries and custom ETL scripts
- Executed Odoo version migrations ensuring data integrity and minimal downtime

Tools: *Odoo, Python, PostgreSQL, XML, Python-Celery, Psycopg2, xmlrpc API, ETL*

Odoo Developer | EUSOL— Lahore *Sep 2020 – May 2022*

Developed ERP solutions for clients in Manufacturing, Foodl,Travels & Tours and Advertisement industries.

- Built custom modules across multiple Odoo versions (v10–v14) for 10+ companies
- Integrated WooCommerce APIs for seamless e-commerce order management
- Maintained data quality by writing SQL queries for data fixes and corrections

Tools: *Odoo, Python, PostgreSQL, XML, WooCommerce APIs, Psycopg2, xmlrpc API*

Odoo Developer | ECUBE — Lahore *Jan2019 – Sep 2020*

Translated business requirements into Odoo ERP applications (Enterprise & Community editions).

- Implemented ERP solutions for Travel & Tours, Food Industries, and Manufacturing clients

- Developed custom modules in Python and XML for multiple business verticals

Tools: *Odoo, Python, PostgreSQL, XML, WooCommerce APIs, Psycopg2, xmlrpc API*

iOS Developer (Internship) | Brainplow — Lahore *Apr 2018 – Jul 2018*

- Developed views and consumed REST APIs for CramFrenzy (e-learning app) and Dhaar (marketplace app)

Tools: *Xcode, Swift 4*

KEY PROJECTS

The Chefz — Food Delivery Application

- Developed custom APIs to integrate mobile app invoices directly into Odoo
- Built fully customized invoicing system based on Odoo's default invoicing engine
- Managed large-scale data fixes for a high-volume food delivery platform

Rawnaq — Travels & Tours Reservation System

- Designed a fully customized reservation system covering Flights, Hotels, Yachts, and Local Transport on a single page
- Automated generation of customer invoices, vendor bills, and agent commissions

Delight Canada — LED Lighting Solutions (CRM to Accounting)

- Implemented end-to-end solution from CRM to Accounting with custom invoicing flows
- Supported multiple payment structures: progressive, deposit %, and full payment

Whataparatha — Multi-Branch POS Synchronization

- Built custom POS system with real-time synchronization across multiple branch databases via XMLRPC
- Designed centralized DB architecture allowing cross-branch order management

Multimodal Emotion Detection — Final Year Project

- Processed physiological sensor signals (GSR, ECG, Pulse, Respiration) in MATLAB with noise-filtering
- Applied SVM and K-NN machine learning algorithms; achieved high accuracy with SVM

EDUCATION

Bachelor of Science in Computer Science *2017*
